Appl. no. 10/512,002  
Atty. ref. 0-010302USWZFN

### **AMENDMENTS TO THE CLAIMS**

This listing of claims replaces all prior versions and listings of claims in this application.

### **LISTING OF CLAIMS**

- 1-2 (*canceled*).
- 3 (*previously presented*). The covering of claim 11 wherein said at least one additional component comprises an ultra-violet pigment, an infrared pigment, a metallic film, metallized threads, and combinations of any of the foregoing.
- 4 (*previously presented*). The covering of claim 3 wherein at least one of the components comprises a metallic film and a second component, adjacent the first component, comprises an infrared transparent polymer.
- 5 (*currently amended*). The covering of claim 11 wherein at least one of the components comprises a ~~radio~~ radar absorbing material.
- 6 (*previously presented*). The covering of claim 11 wherein at least one of the components comprises a phase change material.
- 7 (*previously presented*). The covering of claim 11 wherein at least one of the components comprises an acoustic absorber.
- 8 (*previously presented*). The covering of claim 11 wherein said covering is flexible.
- 9 (*previously presented*). The covering of claim 11 wherein said colored camouflaging image represents an environmental background.
- 10 (*canceled*).
- 11 (*currently amended*). A camouflage covering capable of providing protection against multiple detection methods, said covering comprising a sheet that comprises
- a) an ~~embossed~~ exterior surface bearing a colored ~~camouflaging~~ environmental background image, said exterior surface further comprising an uneven profile;

- b) an adhesive exterior surface opposite said ~~embossed~~ exterior surface; and
- c) between said exterior surfaces, at least one additional component ~~capable of~~ providing protection against detection by at least one ~~sensing method other than visual inspection and surface profiling~~ of ultraviolet sensing, infrared sensing, thermal imaging, radar and acoustic imaging.

12 (*currently amended*). The camouflage covering of claim 11 further comprising a second sheet comprising an ~~embossed~~ exterior surface bearing a colored, digitally printed camouflaging image, said exterior surface further comprising an uneven profile and an adhesive exterior surface opposite said ~~embossed~~ exterior surface, said second sheet overlaying and being removably adhered to said sheet.

13 (*currently amended*). The camouflage covering of claim 12 wherein said second sheet further comprises between said exterior surfaces another at least one additional component ~~capable of~~ providing protection against detection by at least one ~~sensing method other than visual inspection and surface profiling~~ of ultraviolet sensing, infrared sensing, thermal imaging, radar and acoustic imaging.

14 (*new*). The camouflage covering of claim 11 wherein said at least one additional component comprises a flexible magnetic film.

15 (*new*). A camouflaging article comprising:

- a) a flexible polymeric sheet having two primary opposing exterior surfaces, wherein a first primary opposing exterior surfaces is in direct contact with an adhesive layer and wherein a second primary opposing surfaces both bears a digital image of an environmental background and includes an uneven profile, said polymeric sheet further comprising an ultraviolet pigment, an infrared pigment, a metallic film, metallized threads, and combinations of any of the foregoing; and
- b) a disposable backing sheet overlaying said adhesive layer.

16 (*new*). The camouflage covering of claim 15 further comprising a second flexible polymeric sheet having two primary opposing exterior surfaces, wherein a first primary

opposing exterior surface of said second polymeric sheet directly contacts and is removably adhered to said second primary opposing surface of the first polymeric sheet and wherein a second primary opposing surface of said second polymeric sheet both bears a digital image of an environmental background and includes an uneven profile, wherein said digital image of said second polymeric sheet is not identical to said digital image of said first polymeric sheet.

17 (*new*). A camouflaging article comprising:

- a) a flexible polymeric sheet having two primary opposing exterior surfaces, wherein one of said primary opposing exterior surfaces is in direct contact with an adhesive layer and wherein the other of said primary opposing surfaces both bears a digital image of an environmental background and includes an uneven profile, said polymeric sheet further comprising a radar absorbing material; and
- b) a disposable backing sheet overlaying said adhesive layer.

18 (*new*). The camouflage covering of claim 17 further comprising a second flexible polymeric sheet having two primary opposing exterior surfaces, wherein a first primary opposing exterior surface of said second polymeric sheet directly contacts and is removably adhered to said second primary opposing surface of the first polymeric sheet and wherein a second primary opposing surface of said second polymeric sheet both bears a digital image of an environmental background and includes an uneven profile, wherein said digital image of said second polymeric sheet is not identical to said digital image of said first polymeric sheet.
